Reduce Your Dental Equipment Repair and Maintenance Costs by 13%!

Dear (Name):

You can reduce your dental handpiece repair and maintenance costs by up to 13 percent with Hayes' co-operative GSA Federal Supply Schedule Blanket Purchase Agreement (BPA).

With Hayes' BPA you get a special account that lets you place orders only when you need them. You're never required to buy a minimum amount of services. You won't even need to let us know ahead of time the amount of repairs you require or how often you'll need them done!

Hayes' BPA will reduce the time you spend processing repair and maintenance orders since you'll never again have to fill out numerous individual orders for the same type of repairs. This means you'll be able to run your office more efficiently and reduce your repair and maintenance costs.

Hayes is a qualified **service-disabled, veteran-owned small business (SDVOSB)** with **multi-certification (8a/SDB and Hub Zone) status**. We've been providing high quality, affordable handpiece repair for more than 15 years.

I would like to meet with you and your team to discuss proven and cost-effective solutions to managing Region IV's dental equipment repair and maintenance requirements.

I will call you next week to set up a convenient date and time to talk.

Sincerely,

Elbert Mackey
General Manager
